Municipality Mayor Suggesting Actions Needed

Rupert Gole, župan | *Mayor*

Some suggestions ...

• **Developing innovative and user friendly concepts of on-line communication with the citizens, institutions, visitors... using also mobile hardware and software applications.**

Some suggestions …

• Organization of co-government. Joining more communities governments in the way of rationalization and make it more efficient. Managing should be supported with efficient digital tools to communicate with the citizens.

• We are going to organize some parts of community government for three communities in Mirna Valley – Šentrupert, Mirna and Mokronog-Trebelno.

• Example: One part of community government which generate a lot of information exchange is "Environment and space". Using such tolls as "3D planning Information" makes communication with citizens and institutions faster and easier.

Some suggestions …

- **It would be interesting to organize cooperation with similar groups of communities from one of the partner countries in our Project.**

Thank You!

Rupert Gole,
Mayor of Community Šentrupert
