Technology Neutral Access to ...

20.9.2011

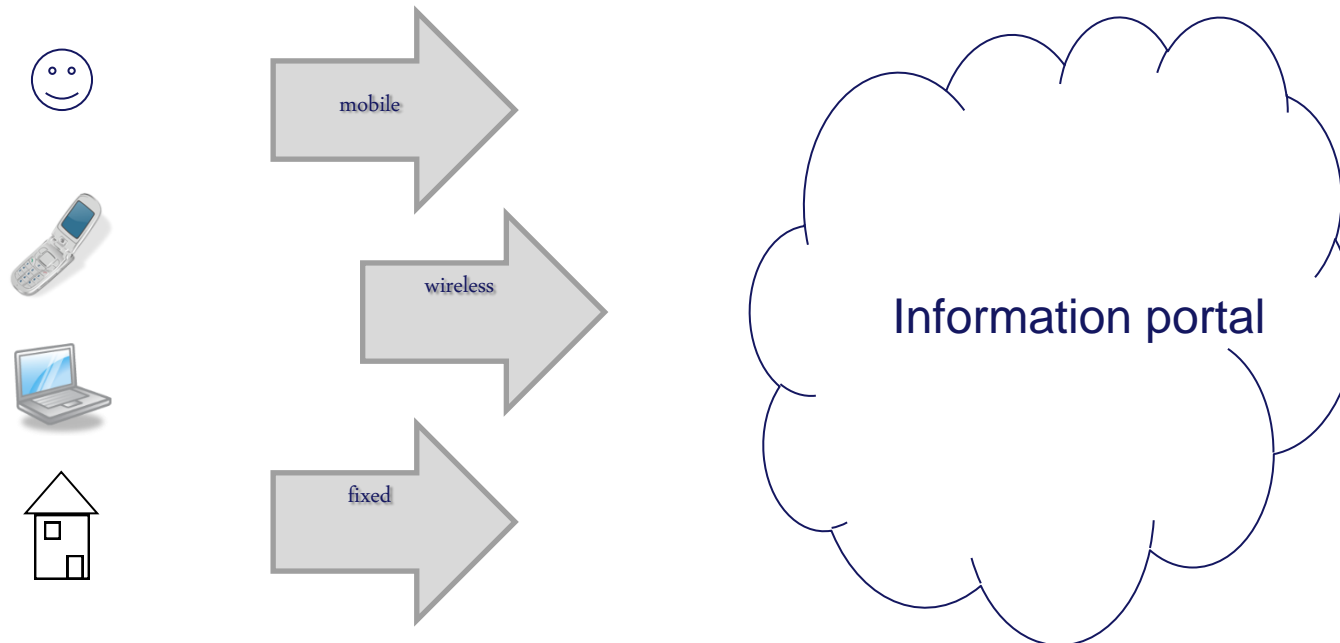

dr. Blaž Peternel

Why active role in the initiative?

- deploying new technologies and developing prospective services means:
 - we have to share a research work with young smart users = UNIVERSITIES
 - we have to communicate with users we are offering services to = MUNICIPALITIES/LOCAL AUTHORITIES (HD Voice)
- focus:
 - TS operates all newest wired and wireless technologies and provides the best mobile & fixed BB coverage in Slovenia (FTTH/HSPA+, LTE pilots)
 - TS offers infrastructure for nationwide e-inclusion of population
 - TS suggests models for bridging the BB gap in rural areas (OpenBS/FTTN/xDSL)
 - TS supports R&D projects with universities (contracts with 7 laboratories in Slovenia)
 - TS is applying for R&D EU funding, which helps bring new advanced services on market

Technology Neutral Access to ...

- municipality's information portal

Cross-border ...in medias res

- **expensive roaming may be a problem**
 - Free WiFi Access? Who operates WiFi networks?
 - R&D work on technical solutions for enabling free access to information portals over mobile network for tourists in Slovenia
- **e-tourism:**
 - R&D work on integration of WSN into mobile networks with perspective of bringing remote natural habitats and turistical points of interest to urban centers (e.g. LIFE+)
