ECRN & STORK: the future

STORK and ECRN synergies can be considered the basis for a new generic platform for secure document exchange in Europe

- ✓ A unique platform for different type of documents (civil act, PA documents etc), with minimal technical effort for configuration and usage.
- ✓ The users will be able to authenticate themselves to access all services using their national eID system.
- ✓ The STORK platform will be used also for the cross-border validation of signed digital documents provided by ECRN.

Centralni register EK
za trgovanje z emisijskimi kuponi

• Uporaba v nacionalnih rešitvah za avtentikacijo:

- Španija
- Grčija
- Slovenija (v pripravi) – podpora Informacijskega pooblaščenca!
- itd.
