

Zoom Meeting on Wednesday, September 13, 2023, 17:00 – 19:00 CET

Artificial Intelligence (AI) Applied to Seniors 55+ in the Silver Economy: An Analytical Balance Between Ethics, Technology and Social Concerns

Chatbox Content

17:24:40 From Osnat Lustig - Seattle, WA USA To Everyone:

The mix and distribution of the technological naive will shift over the coming years. The younger adults of today, already tech savvy, will be tech savvy older adults in 20 years. It's the older adults in weaker economies who might continue to be challenged.

17:28:34 From Osnat Lustig - Seattle, WA USA To Everyone:

<https://www.e-vita.coach/> companion robots - Germany/Japan research initiative

17:32:06 From Tom Mottl, Boston MA To Everyone:

Monique's point regarding posing the correct question as critical to getting a useful, meaningful response from an AI application is exactly correct. This book, "Impromptu: Amplifying Our Humanity Through AI" by Hoffman, Reid, provides particularly interesting and useful examples of this issue.

17:34:48 From Anna Grabowska, Poland To Everyone:

ChatGPT and Artificial Intelligence in higher education: Quick start guide, https://www.iesalc.unesco.org/wp-content/uploads/2023/04/ChatGPT-and-Artificial-Intelligence-in-higher-education-Quick-Start-guide_EN_FINAL.pdf
<https://dehure.moodlecloud.com/course/view.php?id=20>

17:36:08 From Paul Timmers To Everyone:

Interesting set of presentations with a lot about ethical AI (and generative AI) were at the recent Digital Humanism Summer School: <https://caiml.dbai.tuwien.ac.at/dighum/summerschool2023/program/> (look for the word 'slides')

17:36:36 From Tom Mottl, Boston MA To Everyone:

One additional thought regarding asking the correct question in using AI applications - if one is fortunate to have one or more support staff in any given project or experiment, it is critical to be very specific and clear in discussing objectives, goals, and needed information regarding what is being worked on.

17:38:25 From Anna Grabowska, Poland To Everyone:

anka.grabowska@gmail.com

17:39:53 From Justyna Stypińska To Everyone:

Reacted to "anka.grabowska@gmail.com..." with 👍

17:40:33 From Osnat Lustig - Seattle, WA USA To Everyone:

Chat GPT translates beautifully from and to many languages.

17:41:58 From Tom Mottl, Boston MA To Everyone:

Specificity and clarity regarding the points raised in the context of either queries to CHAT GPT or to support staff must be thought of very carefully not only in terms of the general points raised in my last chat message, but particularly with respect to the difficulties of interpretation and meaning of individual words, especially when dealing with multilingual conversations.

17:42:39 From Justyna Stypińska To Everyone:

I am a researcher at the Social Sciences Research Center in Berlin and am leading an international research project on ageism in AI and would like to invite you to have a look at our website with short information about the project -

<https://www.wzb.eu/en/research/digitalization-and-societal-transformation/globalization-work-and-production/projects/ageai>

17:43:17 From Justyna Stypińska To Everyone:

also, if you are interested in the project, please contact me at justyna.stypinska@wzb.eu

17:44:52 From Franc Bračun To Aleksandar Erceg, EFOS Osijek (Privately):

Microsoft announced last December that it will invest in its own power plant because they want to ensure a reliable supply of electricity for large language models supporting chatGPT and similar solutions.

17:46:22 From Tom Mottl, Boston MA To Everyone:

The power of AI applications is enormous because of the scope of the data/databases it accesses. A critical issue is what is termed by many AI researchers is the "reliability" of the response given to any particular query made to the AI application, i.e., does the response reflect incorrect, misleading, or outright false/nonfactual data!

17:48:39 From Justyna Stypińska To Everyone:

I welcome you to have a look at my open access article in Journal AI And Society: <https://link.springer.com/article/10.1007/s00146-022-01553-5/metrics>

17:49:36 From Osnat Lustig - Seattle, WA USA To Everyone:

Libraries will be very useful when the AI tools cease to be free of charge, which is on the horizon.

17:54:57 From Franc Bračun To Aleksandar Erceg, EFOS Osijek(Privately):

Whether we can trust AI answers or not is a big challenge. Therefore, a critical view of the answers is important. This is where domain knowledge often comes into play. But not everyone has that. Some try to address this by having models judge other models on whether their answers are trustworthy. An interesting game, for which it is not clear where it will lead in the end.

17:57:36 From Osnat Lustig - Seattle, WA USA To Everyone:

recent trend - using GhatGPT to self-diagnose your medical symptoms. Review of the results by health professionals found that the diagnoses were quite accurate. In the era of telehealth, and ease of access to primary care (at least in the US) this might be a growing trend. <https://kffhealthnews.org/news/article/chatgpt-chatbot-google-webmd-symptom-checker/>

17:58:08 From Justyna Stypińska To Everyone:

Reacted to "recent trend - using..." with 

17:59:45 From Franc Bračun To Everyone:

Whether we can trust AI answers or not is a big challenge. Therefore, a critical view of the answers is important. This is where domain knowledge often comes into play. But not everyone has that. Some try to address this by having models judge other models on whether their answers are trustworthy. An interesting game, for which it is not clear where it will lead in the end.

18:00:48 From Franc Bračun To Everyone:

Microsoft announced last December that it will invest in its own power plant because they want to ensure a reliable supply of electricity for large language models supporting chatGPT and simmilar solutions.

18:04:58 From Tom Mottl, Boston MA To Aleksandar Erceg, EFOS Osijek(Privately):

I had a discussion with Paul Timmers about 2 years ago on a topic of common interest, but no longer have his email address, and could not find it just now on Google. I would like to inquire regarding his comment on using an AI ChatBot in his work. @ould it be possible for you to send me his email address or provide him my email address if he would be willing to discuss this topic with me? Thank you.

18:08:03 From Matej OZEBEK, SLO To Everyone:

Is powr consumption known? What kind of power plant are they plan to build-fuel, solar,...if you maybe know.

18:15:55 From Osnat Lustig - Seattle, WA USA To Everyone:

+1 @Guillermo - integrating cultural intent in the language used to interact with generative language models

18:16:52 From Franc Bračun To Everyone:

I don't know, but here is interesting article about this: Microsoft Bets Helion Energy's Fusion Power Plant Will Be Live by 2028 ([businessinsider.com](https://www.businessinsider.com))
