

Developing the Silver Economy and Related Government Resources for Seniors

A Position Paper

The Follow-up Actions

Dr. Luigi Campanella, Professor Emeritus, October 2022

Dear Signatory, [Developing the Silver Economy and Related Government Resources for Seniors. A Position Paper](#)

Dear Member, [Professors Emeriti Network](#)

On Wednesday, the 16th of November, 2022, we will have our next Zoom meeting. We will start from the conclusion of the last meeting I chaired on September 19, and of the Slovenian event on 30th September.

We agreed about the birth and growth of a Network among all the Associations of the Third Age with specific attention to the cultured active components. We also agreed about the relevance of such a network for the development of Silver Economy, to be considered a great opportunity for improving economic situation. Precious instruments for these two goals are the Institution of a Minister of Seniors (With great pleasure I read that on the birth of the New Italian Government a Minister of Old Age is considered as possible innovation) and of the Council of Old Persons, both instruments being able to give political essence to our proposals.

My opinion is that we must go on in this direction collecting adhesions in order to reach a critical dimension from which to start with a first concrete step that should be the formal creation of the Network.

Key words:

Network, Silver Economy (I suggest capital letter as initials), Minister, Third Age, Old Persons, Services for Old, Ageing of Population, Emeriti, Retired, Active Researcher

Best greetings and thanks for the attention.

Luigi Campanella

Wednesday, Zoom Meeting, November 16, 2022, 17:15 – 19:00 CET
